

Abstract Of The Disclosure

5 The present invention is directed to a method of making a nonwoven
cleaning article, which exhibits a plurality of three-dimensional images whereby
the fabric is comprised of at least a first and second three-dimensional image that
are dissimilar from one another. The three-dimensional images may be imparted
into the fabric in a co-planar arrangement, multi-planar arrangement, or by
utilizing both arrangements within the same fabric. Further, the present
invention contemplates a cleaning article comprised of a plurality of three-
dimensional images which can provide the fabric with various physical and/or
10 aesthetic performances.
